Approvals and Markings

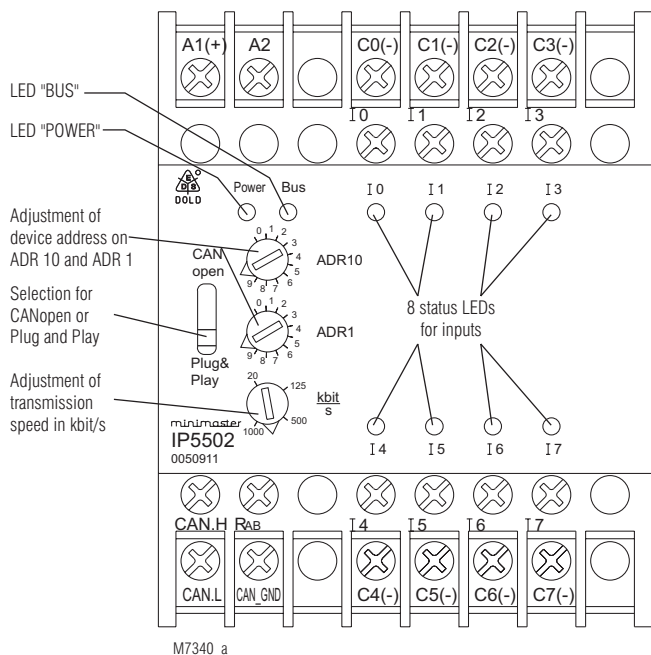

Application

The digital input module IP 5502 collects signals of a control circuit from limit switches, push buttons, sensors etc. The modules are used in industrial control circuits and building automation.

Indicators

- Yellow LED "Power": On, when supply connected
- Yellow LED "BUS": On, when bus is active
- Green LEDs I₀ ... I₇: On, when input signal applied

Setting and Adjustment

M7340_a

CANopen operation

With switch in position "CANopen" the CAN bus runs the CANopen protocol. The configuration is made with the programming software PN 5501 in conjunction with minimaster IL 5504 / IN 5504 or e.g. with ProCANopen. The corresponding configuration file on CD can be ordered under order no. PN 5501, article no. 0052860

Plug and Play operation

With switch in position "Plug and Play" the CANopen bus runs a variant of the CANopen protocol and allows only to operate Dold modules that have this feature. If a system is configured in Plug and Play operation, it can be altered to CANopen at any time.

Address setting in Plug and Play mode

To allow the input module to communicate via CAN-bus with a corresponding device, the address has to be adjusted on the 2 rotational switches on the front see below: The addresses 1 ... 49 and 51 ... 99 can be chosen. In Plug and Play mode the addresses 0 and 50 do not exist.

| Input module IP 5502 with address | transmits to | Output module IP 5503 with address |
|-----------------------------------|--------------|------------------------------------|
| 1 | → | 51 |
| · | | · |
| 49 | → | 99 |

Example of setting:
Upper rotational switch "ADR 10": Address 14
Lower rotational switch "ADR 1": In position 1

Setting and Adjustment

Set-up procedure

- 1.) Connect device to CANopen-bus
- 2.) Terminate bus on both ends with bridge between CAN-H and R_{ab} on first and last module.
- 3.) Adjust transmission speed (e. g. 20 K bit / s)
- 4.) Adjust device addresses

Attention:

To allow transmission in Plug and Play mode, one of the input modules e.g. IP 5502 of the CAN-bus has to be set to address 1.
